

BioTE[®] Probiotic Dietary Supplement

Probiotics are live microorganisms that are either the same as, or similar to, those found in the human body. Although we tend to think of bacteria as harmful "germs," many bacteria actually help the body function properly. Probiotics have been shown to aide a variety of gastrointestinal issues including immune system support.

The word probiotic mean "for life". Probiotics or the "good bacteria" comprise approximately four (4) pounds of our body weight. The human digestive system contains approximately 3.3 million genes from more than 1000 species about 150 times the 20-25,000 genes in the human genome. The "good bacteria cells" also out number outnumber human cells 10:1.

The primary function of the "good bacteria" are:

- ✓ Immune Support
- ✓ Digestive Support
- ✓ Elimination
- ✓ Vitamin production

The BioTE probiotic contains two(2) strains of Lactobacillus and one(1) strain of Bifidobacterium.

The BioTE probiotic also delivers the "good bacteria" via an innovative capsule technology that protects the "good bacteria" form being destroyed by harsh stomach acids.

This innovative capsule technology also delivers more viable/live "good bacteria" to the intestines where they perform their magic.

*4 Billion CFU at time of manufacture

Supplement Facts

Serving Size: 2 Capsules
